Please take note of the following

- **The 35% discount applies to the development cost only** — the compulsory design fee is billed at the full rate.
- Website development is a process that generally takes between 2 - 6 weeks from the date all information is received by our team. Please allow enough time for this in your planning.
- The client is responsible for providing our team with all relevant website content such as: a high-quality logo, written "about us" section, product images if the website is an eCommerce site etc. We can supply stock website images at no additional rate, excluding product images (eCommerce).
- The client is responsible for providing all necessary information / content / feedback within a reasonable timeframe. If a process is hindered/stalled by the client for a duration exceeding 30 days, the process can be deemed complete by BaseCloud and further work requested by the client will be billed additionally.
- Premium copywriting is available at an additional fee. · Hourly rate for custom development, additional work, and deviation from standard work @ \$200 p/h.
- Each project will have an "Effective date" — the date BaseCloud moves the website from a staging server to the client's dedicated server and starts billing for maintenance services, irrespective of whether onboarding has been completed. BaseCloud plans its processes around these dates to ensure delays are limited and deadlines are met.

Sales tax is not included in the above pricing. Pricing in USD.
